Declass Review by NGA.

1. This memorandum is in answer to referenced requirements, which request prints and general information about the cement plants in Ta-T'ung, Communist China.

2. In partial answer to the first referenced requirement and in answer to the second, the photo enlargement titled "Ta-T'ung Cement Plant" (CIA/PID/IB-P-306/63) is enclosed. The second plant was not found. The length of the covered kilns cannot be determined due to the poor quality and obliquity of the photo. A dry process is probably used since no slurry tanks are visible. This plant probably has two kilns since two similar stacks can be seen at the near end of the largest building. The plant was in operation at the time of photography.
